Skills

Python university, Luxonis, DataSentic

AWS DataSentic

LLM / RAG DataSentic

Azure DataSentic

Git everywhere

Docker university, Luxonis, DataSentic

Machine Learning university

C++ university, Luxonis

ROS Luxonis

Maven, Jira, Java Aimtec

Languages

English B2

Czech (native)

Education

Ing. in NLP

Sep 2022 – Jun 2025

University of West Bohemia

Faculty of Applied Sciences, Department of Computer Science and Engineering

Computer Science, specialization: **Natural Language Processing**

Thesis: Czech Railway Traffic Light Detection

Bc. in Computer Science

Sep 2018 – Jun 2022

University of West Bohemia

Faculty of Applied Sciences, Department of Computer Science and Engineering

Thesis: Architecture Style Classifier

Work Experience

Lead SW Engineer & Solutions Architect

Oct 2024 – present

DataSentic, a Bull company

Full time from Jun 2025 (contract). Key projects:

ID Coding Assistant – Custom LLM-powered coding assistant with user management and internal repository knowledge base for a German client. Built on **Microsoft Azure**.

PII Detection – Cloud-based app for identifying Personally Identifiable Information; fine-tuned a **custom NLP model** for specific language requirements.

MyKate – Internal RAG system for bank employees (KBC/ČSOB), used by **thousands of users**. Built on **AWS**, Python.

Python, C++ Software Developer

Jul 2023 – Oct 2023

Luxonis

Part time (4 months). Participated in projects for companies like **Vermeer**. Gained experience with robot operating system (**ROS**), **Docker**, and integration of neural networks into smart cameras.

Java Software Developer

Jul 2021 – May 2023

Aimtec a.s.

Agreement on performance of work (1y 11 months). University internship that evolved into internal and customer-facing development projects.

Top 3 from Many Public Projects

- **Czech Railway Traffic Light Detection** – Detection and classification of railway signals from video using **YOLO / RTDetr**. Custom annotated dataset, deployed as a **Hugging Face Space**.

- **Correlation Formula Solver** – Parallel genetic algorithm discovering correlation formulas between 3D accelerometer data and heart rate. Uses **Vulkan GPU**, multithreading, PhysioNet data.

- **Architecture Style Classifier** – Android app using CNN to classify building architectural styles from photos. Trained on a custom dataset, part of bachelor's thesis.
